[Jessica Lehto : Lead Vocals]

During centuries, and beyond creation  
They live on the deep space  
Without conflict, in brotherhood  
Constellations are a good example  
Of how humanity should live  
Formed by fragments  
Forming a pure unity

Im living my dreams on a far away place  
with a lot of light I get to see  
the universe shinning  
Within my own star im secure and protected  
here nothing can harm me  
I cud live into the stars  
living my dreams, when universe is shinning

[6 Ethereal Breeze.]

Just like ethereal breeze,  
I see time passing by

As a gentle breeze time moves on my life

Asteroid Rain, is fury  
Power sets off and brake with all its fury  
Asteroid Rain is energy  
No one can control nor predict its character  
Not everything is peaceful and quiet  
Spills its power within a far away galaxy  
Asteroid Rain, its savage  
and once free it will get to its end  
when the space claims for it.

[9 Beyond Time.]

[Santiago BMegaphone voice]

Beyond space and life, there's light of life  
Beyond space and time, theres fellings  
Fellings are part of my life  
And through everything there  
will always be hope! Time has no space, time  
has no space.Beyond space without limits...

[10 The Final Chapter]

[Beto Vazquez: Spoken words]

Upon a dark time, will living free full of justice  
I will by my guide,  
BEYOND SPACE WHITOUT LIMITS.
