Hey Madalyn  
Why are you shooting rubber bands  
To scare away the lions  
Tell it to Ann Rand  
Hey Nietzsche boy  
What got in your head  
Turns out you were wrong  
And only Freddie's dead  
You have more faith than me  
You have more faith than me  
Hey David Hume  
Your statements make me pause  
You don't believe in miracles  
You just believe in first cause  
Hey Jean Paul  
Write another play  
The truth exists and so do you  
And you can't make that go away  
We did not follow myths  
We did not follow lies  
Proof of the resurrection  
Stands before your eyes  
Professing to be wise  
They have become fools  
External power has been seen  
You are without excuse  
Hey Charles Darwin  
It's a natural selection  
If it's there and no one can see it  
It escapes detection  
Hey Mr. Skinner  
I hear you today  
It doesn't matter if it's true  
You had to say it anyway
