High school enforced the way to achieve diploma
Will get you all that you need.

Follow their system bent to their threats
And 4 years later you're buried in debts.

Is it education of just wasting your time.

Learned how to drink and how to get laid,
And when it's all over you want to get paid.
Been called a loser, ruined moms dreams,
But I don't rate success by some college degree.

Is it education or just wasting your time.

I know what you've been taught. I know how you feel.
I know that you've been caught and it's lost all it appeal.
