Standing in the shadows
You've been there all night;
No one's gonna find you
When you're out of sight
When you're looking like you do
It should be all eyes on you
No doubt you're good to go;
'Stead of looking for the door
Get your fine ass on the floor
Take your place and start the show...

Breakout! Don't you stop it
Go get your party on
You can't spend the night alone [x2]

What's the using in watching
Holding up the wall?
Sipping on your one drink
Makes no sense at all!
Dip your head and finish fast
Don't you let this moment pass
I know you hear your song...
You don't have a thing to lose
Time to work you Jimmy Choo's
Dj's rocking all night long...

Breakout! Don't you stop it
Go get your party on
You can't spend the night alone [x2]

Just let the music do you right
Go show the world it's on tonight...!

Breakout! Don't you stop it
Go get your party on
You can't spend the night alone [x2]

(Additonal bvs) let the music do you right
Show the world it's on tonight
