My baby keeps talkin' but dogs talk too much. baby
Well can't you shut your hole, and keep it that way for a
while
A pretty face underneath me, you see
Well, I'm your poison now so drink my cold coup of
disease
Well check this
Something
My baby likes rollin' but rollin' makes you dizzy inside
Well, slide up and down, Juicy makin' me kind of wild
Yeah, sister don't tell, sister don't tell what they do to
you
Now don't fall asleep, just open up and say with a smile
It's wild
And this is what she said
Something to swallow
Gimme something to swallow
Gimme something to swallow
Well it's not the whiskey
Down in the Soho bars that she likes
Gimme something to swallow
I wanna tell you what she did in bed last night
She jumped right up on the floor and spread up her
legs
She said I don't like being your baby tonight
Don't you come around for more 'cause I've got hell to
pay
And if you wanna do my little rattlesnake shake
You better stick to your guns 'cause it's a tricky
romance
Move up and down get so close up to the bones
That's the way I wanna hear it when he says
She shoot me down
Something
Gimme something to swallow
Gimme something to swallow
Well, it's not the whiskey
Down in the Soho bars that she likes
Gimme something
Something to swallow
