"We Go A Long Way Back"

Visit "[We Go A Long Way Back](#)" on MotoLyrics.com

Everybody wanna see the fat old lady sing now
Everybody knows that's when the war begins now
And everybody knows I gotta get the wolf in the ring
now

It's about time we put our guns on the ground now
And it's about time we stop fucking around now
It's about time cause I can't hear no sound now

So put your hands on the information man
Put your reckless life down in a sack
Prepare yourself for isolation man
We go a long way back

Look at your face you really need to unwind now
Look at the racks we always leave behind now
C'mon look at the shit that made us all go blind now

So put your hands on the information man
Put your reckless life down in a sack
Prepare yourself for isolation man
We go a long way back x2
