"Whole Thing"

Visit "[Whole Thing](#)" on MotoLyrics.com

the whole thing would still go on without you
and something would still be there to move me
my own thing is always to inspire you

the one that I love I dream beside
the one that I love I dream beside
the one that I love is close as I can get
the one that I love I dream beside
the one that I love I dream beside
sometimes I can't remember
sometimes I can't forget

this whole thing will still go on without you
and it's nothing to do with all of you
my own thing is always to protect you

the one that I love I dream beside
the one that I love I dream beside
the one that I love is close as I can get
the one that I love I dream beside
the one that I love I dream beside

each night in bed my dreams take me over
each night in bed my dreams take me over

the whole thing would still go on without you
and something would still be there to move me
my own thing is always to protect you
my own thing is always to inspire you

this whole world
still goes round without you

you are my whole thing
you are my whole thing
