My mother gave me one more reason
not to call you on the phone
She told me ?chase girls like that
All your life you will wind up alone?
I guess I just would like to take you
Out for a cappuccino
You refuse my advances once again
I can't hear one more ?no?
I wish you would get over him
I'll change your mind about everything
When I wink at you, you always
Turn the other cheek
I drilled a hole in the girl's showers
So that at you I could peek
Id love to get you naked and throw you
In the back of my dads car
I hear that if I get to third base with you
It won't be to far
I wish you would get over him
I'll change your mind about everything
As I grow older I feel better
About me and myself
I swear I never, ever once wished
I was anybody else I'd like to tell you I think you should
Come up and see me sometime
I know that I could possibly make it
The best time of yer life
I wish you would get over him
I'll change your mind about everything
