The calendar page
Can't keep them still
Try to forget it now
I know I will
And all the lives
That they've been saving
They're in disguise
Hating the lie
Now they control it
They've got the reins
It wasn't easy by no means
Gone to great pains
And all the lives
That they've been saving
They're in disguise
Waiting for the light
They check your pockets
For fake ID's
You're feeling lousy now baby
Try some of these
And all the lives
That they've been saving
They're in disguise
Waiting for the light
In disguise hidden away
Now they're dancing on the tables
Stood in line might I say
They're believing all the fables
In disguise hidden away
Now they're dancing on the tables
Stood in line might I say
They're believing all the fables
On the table (x2)
