Hold it doctor can you please, get me through the days  
like these  
Cause I'm lonely and I'm scared and I need to know  
health  
I need to know that someone's there  
God, I need to know if someone does care  
Every dog will have his day, and I think mine's on it's  
way  
And I'm telling it to you because I know that you do  
know  
Understand what I say, when complications cloud the  
way  
Looking back now I can see those white horses  
trampled me  
All I really need's a break, with to repair my worst  
mistake  
And I'm closing in on death, and let me tell you man  
that it's the best  
Understand me if you can, come and give me with you  
well, yeah  
When I walk, or when I run, man I feel like Jesus' son  
And he's telling it to me too because he knows that I  
see  
He'll be passin through that haze, lookin in at all the  
better days
