I've got this picture of us in my mind
The faces painted kind, the smiles true.
It never lasts it seems the colors fade.
With every point I make she'll inch away
One is always wrong, the other holding on.
One of us does not belong here.
Are you all what we expected?
Show me the surface.
Just light me up 'til I
Fall and once more see a strange glow.
It gets familiar when what's underneath starts to show
One of us is wrong. One of us is...
I get this feeling when I look at you
The bottle sees you too.
He's on your side.
It always seems the tighter fist I make
The more they slip away.
They go one by one and one and one.
I watch them all go one by...
One is always wrong, the other holding on.
One of us does not belong here.

Are you all what we expected?
Show me the surface.
Just light me up 'til I
Fall and once more see a strange glow.
It gets familiar when what's underneath starts to show
One of us is wrong. One of us is right.
I don't hear a song. I just smell a fight.
Can we not sleep this off?
Can we just stop this?
You become what I expected.
Float on the surface while I try to breathe under...
One is always wrong, the other holding on.
One of us does not belong here.
Are you all what we expected?
Show me the surface.
Just light me up 'til I
Fall and once more see a strange glow.
It gets familiar when what's underneath starts to show
One of us is wrong. One of us is right.
I don't hear a song. I just smell a fight.
Can we not sleep this off? Can we just stop this?
