What does it take to get a drink in this place? How  
much tension do I need to create?  
In this room to get my message across to the one they  
call "The Queen of all Loss"  
I've got this crush I cannot crush and I'll crush and I'll  
crush and I'll crush and I'll crush until it's dust

I'm not your problem so don't take it out on me  
I've got one problem baby, why don't we just breathe?

Ruins re-erecting just in time for the evening  
Forget what you know about me

Now aren't you glad, now aren't you blessed that I  
made an appearance?  
No need for a card, my name works as clearance.  
And I've got this shake I cannot shake and I'll shake  
and I'll shake and I'll shake and I'll shake until it breaks

I'm not your problem...

Ruins re-erecting just in time for the evening  
Forget what you know about me

They say that I'm crazy  
Maybe lately I've been shady, but now I'm ready to go  
steady  
I'll be the star, I'll be the star of it all.

I'm not your problem...

Ruins re-erecting...

I'll be the star...
