My feelings for you are solid and strong.
I know in my heart to whom I belong.
This beautiful feeling it can't be wrong.
I know.

Cause head over heels I'm falling for you.
And there's nothing that I wouldn't do.
Or rather than give my love to you.

Can't live without you. Can't live without you.
I think about you every night, every day.
Can't live without you. Now that I found you.
I need you right here in my arms to stay.
This love is forever. There is nothing better.
This feeling you've given. You slipped down from heaven.
When we are together. There is nothing better.
I want you so bad. Believe when I hand it only to you.

I promise to you. You're safe in my heart.
I've locked you inside right from the start.
My heart is a place created for you.
That's true.

Wherever you go. I will be there.
If ever you need me. I'll take good care.
That no one can hurt you. Baby I swear.

Can't live without you. Can't live without you.
I think about you every night, every day.
Can't live without you. Now that I found you.
I need you right here in my arms to stay.
This love is forever. There is nothing better.
This feeling you've given. You slipped down from heaven.
When we are together. There is nothing better.
I want you so bad. Believe when I hand it only to
you.
