"To The End Of Time"

Visit "[To The End Of Time](#)" on MotoLyrics.com

The sunlights of forever shine down on you and me
When we are together is the only time we're free
That's when the world stands still, we're the only ones
alive
There's no space in between us if you look into our
eyes

We don't have to touch we just breathe each other's
breath
We only have two choices: paradise or death
The blood has all been given and it's written on the wall
How crazy we've been driven is a mystery to them all

We always played like children and we made love just
like gods
We fought this world together and we lived to spite the
odds
I'd tear through the sky to find you and I know that
you'd find me
We made a sacred promise to find out what we can't
see

We stood out on the edge and we pulled each other
back
And then we disappeared in the middle of the act
We built a sanctuary, had communion without wine
We drank enough to last us to the end of time
