I've heard the rumours spreading all over town
They say im giving you the run around
Believe me darling I never told a lie
Cross my heart and hope to die

Some other fella wants to take you out
And he just trying to fill your heart with doubt
Believe me darling I never told a lie
Cross my heart and hope to die

Pay no attention to the things that you've heard
You're still my only girl I give you my word
I took your best friend out just like they say
She helped me by a gift for your birthday
Believe me darling I never told a lie
Cross my heart and hope to die

I cross my heart and hope to die
Cross my heart and hope to die
Cross my heart and hope to die
