"One Hundred Punks"

Visit "[One Hundred Punks](#)" on MotoLyrics.com

They customised their gear and synchronised
(they)flame out in the streets with flame in their eyes
Guerilla operator ain't heard of cool
Check out any wall - one hundred punks rule
One hundred punks rule

A hundred punks run with london town
Down wardour street to the soho sound
Don't sleep all week only when they fall down

A hundred rumble boys and tumble girls
Protected by steel in a private world
Tomorrow's famous faces advertise today
And the studs on their back say
One hundred punks rule

A hundred punks run the loaded gun
They look so sharp they look like one
If you ain't got the look you'll never be one

A hundred punks run with total suss

A hundred good mates you know you can trust
There's never no bother and there's no fuss
Check out any wall - one hundred punks rule
One hundred punks rule

And jimmy's no.101 knows one day he'll be one
Watch him - watch him go!

A hundred punks run the leather army
I know whose by my side not at home with tv
Even when I'm down I hear them sing for me
Check out any wall - one hundred punks rule
One hundred punks rule

Check out any wall - one hundred punks rule
One hundred punks rule
Check out - one hundred punks rule o.k.
