Your eyes stick out in your head

Make me believe it

You don't need it, you don't need it

You already know

Any time with time

In the meantime

You can leave it

Or not believe it

You're already here

[guitar solo (Pete Ham)]

But in the middle of the oceans

Things don't appear this way

To speak of love, devotion and dyin'

First you must realize

And man, can you spare the pain?

And in the heat of your emotions

Everything leads me to stay

Build a house on higher ground

Man, help me make the change

A man can respect the change

Wear your hair long

Sing a love song

Don't you believe it

You don't need it

You already know

Any time with time

In the meantime

You can leave it

And not believe it

You're already here.
