Darkness is taking a human form  
I never imagined "that" the eyes of god will be there on  
us  
And we will survive... "Ingrained"  
The souls are protecting us... shelters from the end  
Our own flesh and blood,  
... Our forces affiliate.

Humans we are inoculated  
Into the dark forces of death  
Into the sound of souls essence in fear  
Into the path to the end  
Into the Flames till they burned

One sided war has begun... the spirit of evil and the  
soul of light  
Never ending battle we live in but then it's a war within  
us  
And I hold my final breath for the moments remains...  
Sacrifices were made.

Into the bleeding dark we embrace  
Into the pain of days  
The last souls of us  
Into The plague  
Into the mind, into the grief

Into nothing we'll remain... Never Ending
