"Stay in my memory"

Visit "[Stay in my memory](#)" on MotoLyrics.com

I found another point of view
Just a dead-end avenue
I'm growing close back to you
Just what I don't wanna do
Just what i don't wanna do
Is to fall in front of you

Now you can break and you can mend
For all the wrongs that you defend
You learn the hard way in the end

Chorus:

So stay in my memory
You can hide out there
Don't take all my thoughts today
So I can start to begin again (x2)

So I don't wanna be left with all this
I plan to be there by your side
Oh it seems like it could be
Just a dream with you and me

So I don't wanna be left with all this
I plan to be
I plan to be there by your side

Chorus

And you and I we have the stars
And you and I we have the stars
That you left over and over again
And you and I we have the stars
And you and I we have the stars

So I don't wanna be left with all this
I plan to be there by your side

Chorus
