Activate, inferred, de-locate / re-locate
Infiltrate, instigate, penetrate, violate
Your fear for survival, instinctive, addictive
It drives me it commands me
No escape
I follow so closely to watch you as you die
To hear you as you cry
As you're screaming my name

Detected, infected, inserted with virus.
Acetic infusion, genetic intrusion
Incubate my offspring in the cells of your blood
What lies beneath my skin
You can never detract

I become you
As I watch you demise through your eyes
As feed from your death, from your life
From your dreams, from your pain
As you're screaming
Assaulter

Neutralise, humanise, integrate, simulate
Dominate, instigate, extirpate, violate
Your fear for survival, instinctive, addictive
It drives me it commands me
No escape
I follow so closely to watch you as you die
To hear you as you cry
As you're screaming my name

Impulsive, corrosivem aggressive, desire
I seek no redemption for I am forgiven
And given the power to reclaim my birthright
What lies beneath my skin I can never detract.

I become you
As I watch you demise through your eyes
As feed from your death, from your life
From your dreams, from your pain
As you're screaming

Assaulter

Slowly assimilated
Brutally annihilated

Infiltrate, instigate, penetrate, violate
Your fear for survival, instinctive, addictive
It drives me it commands me
No escape
I follow so closely to watch you as you die
To hear you as you cry
As you're screaming my name

Impulsive, corrosive aggressive, desire
I seek no redemption for I am forgiven
And given the power to reclaim my birthright
What lies beneath my skin you can never detract.

I become you
As I watch you demise through your eyes
As feed from your death, from your life
From your dreams, from your pain
As you're screaming
Assaulter
