I'm walking alone  
By the light of the moon  
Someone in the shadows hiding just moved  
She calls out my name  
I turn around  
I staring at a psycho off her merry-go-round  
I staring at a psycho off her merry-go-round  
I staring at a psycho off her merry-go-round

She came here for me  
With a payback from hell  
Voodoo in her eyes and she's chanting a death spell  
It's not a bluff  
She's taking me down  
Dealing with a psycho of her merry-go-round  
Dealing with a psycho of her merry-go-round  
Dealing with a psycho of her merry-go-round

Numbers flash through my head  
Little lies that I told  
Lovers that I mislead  
Promises I broke  
All you players beware  
Breaking too many heart  
Or you may find your fate  
Rests in the hands of one  
Sweet baby psycho

Laughter and tears  
Rage is in bloom  
Waving a gun now  
Screaming I hate you I hate you  
All through the streets  
She's hunting me down  
Running from a psycho off her merry-go-round  
Running from a psycho off her merry-go-round  
Running from a psycho off her merry-go-round
