

Bitter Sweet Despair "December"

Visit "[December](#)" on MotoLyrics.com

So there we were it was cold mid December
The rain it makes me remember
Everything about that night
When I knew everything was right

Dear Samantha here's a song that I wrote fro you
I hope you know that Ill be true
All of the doubts that you may have
wash them away with your past

And there we were alone that night,
I wanted to tell you everything
Cause I felt that it was right.
And there we were alone that night
I wanted to tell you everything, to make you mine.

Don't call me crazy but it hasn't been a day
and I already miss your face
You'll never know just what I know
grab my hand and this Ill show

If the sun doesn't shine
I can look in your eyes
They could light up this town,
They could light up this dark town.
