Shes lying and their dying  
To know what that girl is thinking about yea  
Well shes undercover from all of the others  
I'm telling you that girl is petrified

Well I see her there  
Shes standing over there  
Shes wearing the brightest black around

Your devious smiles yea they'll fool for a while  
But those close to you yea they know the truth  
That deep inside when your alone and you cry

You put up a disguise yea no surprise

Shes got her mind set on a way out of here  
It's a one way ticket home  
To California where the sun will warm her  
And the beaches stretch for miles

Get on that plane  
Fly far away  
Don't look back just spread your wings

Hold your breathe .. invisioning  
Home... set your mind free
