Neighbours, nobody loves you like we do.  
Neighbors, your government has triumphed in finally  
making you a public fit  
for the 21st century.  
Never before has a governing body shown so much  
concern for the economic  
well-being of its subjects.  
Today we have insulated you from countless factions  
who threatens your  
financial viability; such as the poor; the idealistic  
foreigners still  
clinging to their childish notions of social welfare; why,  
you're even kept  
uninformed of useless propagandist journalism that  
reports alleged  
violations of human rights (We all know they wouldn't

many burdens on the pay  
roll! Who needs 'em? Here in the land of the free-time.  
Some other ass  
backward country will give us what we need by  
exploiting its uneducated  
children.  
The Internet has expanded our ability to pacify average  
americans better  
than ever by offering fantastical adventures to every  
corner of the  
imagination. Your home office is the window to your  
world, and the heart of  
your social life. Such reclusive behaviour helps clear

the roads and public  
works from overburden like the lower middle-class and  
others who depend  
shamelessly on their government. Today you are freer  
than ever to do what  
you want, provided you can pay for it!  
Remember, the first word in USA is US  
We have arrived neigh
