The day was sun and summerlight
she said I dont know if its right
and trough the silence of the room
her words like hungry seen us through
and the day was sun and summerlight

She said its been so long, so long
how can I care 'bout right or wrong
and in the shadow of her hear
I could'nt think I did not care
amd the day was sun and summerlight

Beneath the burning summersun
she whispered I still miss someone
with naked hand she took my mind
from dark to dust from rosentime
and the day was sun and summerlight

solo pÃ¶ vers

The sun went slowly down and hazed
the cool of evening cares the day
my words came to her with the breeze
farewell my love now I must leave
and the day was sun and summerlight
Yes the day was sun and summerlight
