Go down, go down you stranger  
There's something waiting for you  
Angels, dolls and honey  
Temples and harpoons

You want your main line Jesus  
Your want your diamond God  
You want to pull the trigger  
And kill the autumn home

So walk believer walk  
Straight into the sun  
Walk believer walk  
Your work ain't never done

Pray on, pray on, my brother  
Now's the time for truth  
Black shadow come a creeping  
Take the soul right out of you

Can you feel the demons pulling?  
Can you hear the devil sing?  
Can you taste the poison in your mouth?  
Feel the weight of his chains

So walk believer walk  
Straight into the sun  
Walk believer walk  
Your work ain't never done

Yeah, so walk believer walk  
Straight into the sun  
Walk believer walk  
Your work ain't never done

Yeah, walk believer walk  
Straight into the sun  
Yeah, walk believer walk  
Your work ain't never done
