

Black Eyed Peas "From Roots To Fruits"

Visit "[From Roots To Fruits](#)" on MotoLyrics.com

More (more)

More (more)

Check it out everybody here we go (c'mon)

Now stop, keep it jumpin' on the floo' (jump)

Bust through the roof white bro (oh)

Rose to the top we're the cream of the crop

When's the last time you heard it this hot?

Black Eyed Peas and you know we don't stop (c'mon)

Roll it up a little bit and make it drop (drop)

Internationally selling and you know how we do

You know the B.E.P will make you bounce (c'mon)

Demonstrate a new way of gettin' down

We get, we gettin' down in your town

spittin' that funk all around

stompin' on the ground

Yeah we be up in the place

People gather round, have a taste

Melodies all up in your face

We droppin that fluid and you know how we do it

They want, they want, they want, More

You got, you got, you got, More

They want, they want, they want, More

You got, you got, you got, More

They want, they want, they want, More

You got, you got, you got, More

They want, they want, they want, More

You got, you got, you got...

Party people, all the party people, all the party people,
all the party people

Party people, all the party people, all the party people,
all the party people

Worldwide fashion rhyme everlasting

Keeping it fresh rockin' it with a passion

apl.de.ap, the man with the flow

Breaking it down like this here we go

Yeah we be up in the place
People gather round, have a taste
Melodies all up in your face
We droppin that fluid and you know how we do it

They want, they want, they want, More
You got, you got, you got, More
They want, they want, they want, More
You got, you got, you got, More
They want, they want, they want, More
You got, you got, you got, More
They want, they want, they want, More
You got, you got, you got...

Where's the party at? (x8)
Party people
all the party people (x4)

Yeah we partyin' in the place
people gather round, have a taste
We got melodies all up in your face
We droppin that fluid and you know how we do it

They want, they want, they want, More
You got, you got, you got, More
They want, they want, they want, More
You got, you got, you got, More
They want, they want, they want, More
You got, you got, you got, More
They want, they want, they want, More
You got, you got, you got More
