I'm hard to handle like bikes with no bars  
We excite stores that got even doors  
Unlock the heated 'cause they know when I sex well  
Left them breathless now they're waiting to exhale  
Waiting to exhale with some competition

So come in and test well  
The next one gets hung and chip of a chisel  
I'm making chicks sizzle  
There's no question to the way I rip the riddle  
I'm awesome, I bring on monsoon when I bloom and blossom

And run over like opossums  
Froze on the road with my bike on they cornea  
Man I'm warning ya, look, the black eyed peas is  
formin' up  
Ring around your throat that's made up of razor blades  
Put the slice and let nice and easy humble days

On out, over, well known casanova  
Can I put on an army, quick to take it over  
Nine on my, count all my figures  
Money on the street went entertainment  
Nowadays brothers are getting paid doing nothing

Reciting the same line with the lame rhymes  
Frontin' rappers actin' like their pops' was orville  
Redenbacher  
They quick to go pop  
But when it's time to fiend for the green they flop  
We do it from the heart like blood  
Create rhymes that flood, and blow up like the Scud  
missile  
Miss out, ha

You can bop your head like this, ha  
When we're dropping bombs like this, ha  
You can bop your head to this, ha  
When we're dropping bombs like this, ha  
You can bop your head like this, ha

My probation over tracks smacks like no other disciples  
Riddle the action of satisfaction brought to you be  
apple  
Alligator now, 'bout to take you on a lyrical voyage  
And bend your sure form I would saturated fat  
The alligat is on the move

I rhyme to be exact, not exactly on the groove  
Several, wopplers, kinetic  
My beat's energetic when reseted  
You wonder why, we put our friend who caligetic  
So check out the fiery, I'm livin' not misery

Supply you with remedies for all these sick whack MC's  
That this is song lurks now, time to go to work  
To senegrate the ignorant, or shall I say the jerk  
Time to contradict now, dig deep to the core  
All I sick can be, but I still rip it raw

With the composition, with the position on steady  
I'm ready for the mission of freestylin' acting shitty  
Converse you with the energy enemy I focus on ya  
Every styles you make I will take and break in front of  
ya  
Irratic gets your presence you've been replaced by my  
essence

The sunshine survive, 'cause that's what we produce  
Refuse to take our ability I use  
To bruise up your brain with lyrics

This is who we is a 3 D, can he get back from where we  
enter  
Lovely entertainment's what we enter  
Feel the force, where we enter like splinter  
Black eyed peas be the fools that'll injure  
Whole career and your body will be injured

Get dealt quick, and I got one for, uh  
How you like me now  
W I double I rippin' up a style  
That's cool and calm, we droppin' a bomb  
And you can nod your head to the rhythm where we are

Some whole new, uh that's well improved  
When I'm over 'cause you know I'ma relax in a rule  
That soothes your body, really really hardcore  
Double, double ta, ta for a while or for raw  
Tap,a, tap a skill, it's the whip appeal then

Apple, Apple comin', comin' in with the gill  
Let's rock this set exceed to terminate  
Time to eliminate the whack that you create  
Arm atticulate, when I circulate over tracks  
Let me get down and just relax

We gettin' down y'all  
We gettin' down y'all  
We gettin' down like this  
We gettin' down y'all  
We gettin' down
