rain pours down over a city  
night has fallen like a stone

are you gone or are you with me  
in my heart i'll never know

if i close my eyes i'll see you  
hear your footsteps in the rain

in my dream i'll never find you  
but i'll hear you call my name

oooooooooh

ooooooooooooooooohhh  
as i tread through crowds of people  
trying to keep from looking back

got your sense on something passing  
and it sends me off my track  
do i find you will i follow  
to forever and a day  
i can feel you in the distance  
but you seem so far away

what if i just can't find my way back home  
what about all the things i just don't don't know  
what if i just can't find my way back home  
would you be there to show me where to go

oooooooooh

ooooooooooooooooohhh

what if i just can't find my way back home  
what about all the things i just don't don't know  
what if i just can't find my way back home  
would you be there to show me where to go

x2
