My friend soul came back to me and he said how are
you
And where have you been, I told him I got lost
somewhere
Along the way, now I've come to stay I told him
I want to go up to that hoedown in the sky
I want to be there when I look him in the eye
I want to see all the things we need to be
My yes and no's from head to toes and sing eventually
I wanna'
Take note son of the things around you and watch the
way
They get so strange and unscrewed, you know that
Something somewhere's gonna' have to give
Don't worry 'bout a thing 'cause you're gonna' life
Sabbath may not come... I don't care
Sun it may not shire... Oh I still don't care
Seas they may not flow... Don't fear it
It means as much to me as a chicken in a biscuit
