A radical beginning
Fulfilled by all disgust
Demasked putrid theorems
Clotted blood under porous skin
Decline seems to be
Just a question of time

Rise of the synthesis
Ascent towards undefined twilight
Spreaded depression
At the path's peak
A refusal campaign
War of regress
The slime to overcome

... and did you fuckers think you were worth the pain?

Never resting
The wanderer is taking over
The darkest valley
The lightest height
Senseless passion in time
A blossom that's never gonna open

... and the world is still the cause for all that pain
