higher & higher, flying deep inside your love
i'm so addicted, i just can't get enough
you've formed a habit of love i can't escape
you've got your love potion flowing through my veins
and darling

i just can't stop 'cause you've struck my mainline
can't stop this feeling inside my brain
i just can't stop you're working on the mainline
to my love
mainline to my love
mainline to my love

your love is well worth the price i had to pay
'cause once your love hit me, everything had changed
this world is much brighter, nothing seems the same
you sent your love through me every since you came
and i know

i just can't stop 'cause you've struck my mainline
can't stop this feeling inside my brain
i just can't stop you're working on the mainline
to my love (oww)
mainline to my love
mainline to my love (oww)
well, well

i just can't stop 'cause you've struck my mainline
can't stop this feeling inside my brain
i just can't stop you're working on the mainline
to my love (oww)
working on my loveline
just working on my love (oww)
just keep working on it

nothing is the same
every since you came my way, babe
