Loki: the ancestor of Scandinavian pantheon  
The father of snake Midgard  
With the servants enlightened by wild flames...  
Shall be the causer of Ragnarok  
By not missing the opportunity to play tricks on his  
master Odin

The poetic depiction of wheat fields waved by breeze  
Was Sif's hair; what Loki cut  
Learning this, Thor took Loki  
And swore him in having Black Sylphs make hair of  
gold  
For Sif, which grow like the natural

Freya desired strongly to get the necklace  
Made by four dwarfs  
The dwarfs, making love with each one for a night, in  
return,  
Said that they could give it to her  
Loki, hearing this bargain, informed Odin, husband of  
the goddess  
Then he assigned Loki to steal the necklace.  
They witness an irony with the supernatural,  
Which reveal the meaning of human freedom.

When the sun darkens, the soil is taken in by the sea,  
And the bright stars fall from the sky  
People shall fight till all the world is on fire.  
Upon this, the Gods shall be armed  
For a last war against the forces of evil

After Ragnarok, shall a new soil appear  
Productive, green, fine, new that hath never been  
before  
And in the air shall a new sun start to rotate, brighter  
than ever.

In the water exists the soul of died down fire!
