"Arms With Arms"

Visit "[Arms With Arms](#)" on MotoLyrics.com

Born to be together
Until our life is over
We stand side by side
Never care how life treats us bad

We built ourselves from strangers
Through everything in pain and sadness
We climbed this ladder of uncertainty
And laid ourselves

We remember how it all started
No one ever care about us
But we stood strength with brothers believe
And we win it in our own league

We take each other hand
And never regret how it began
We're brothers in fate
We're brothers never separate

We built ourselves from strangers
Through everything in pain and sadness
We climbed this ladder of uncertainty
And laid ourselves
