You are trespassing our territory
In few seconds in life you will be blackened by us
You are trespassing our territory
In few seconds in life you will be blackened by us

Shattered to the ground!
Denial leave hole in this trust
Within people that live among us!
Triggered words of lying oath
Become a whisper songs to this ear
It stays on top as our own fear!

Do not create any scene!
This is BLACK TERRITORY!

Look upon the sky
Of what we have become
Do not create any scene
This is BLACK TERRITORY

Look upon the sky
Of what we have become

Every single sight will brought fear to eyes
Beholding your breath
And still can't calmed worries inside
The mind trying to stood still
And convince the hope
That led the path to nowhere, anywhere

You are about to be blackened by us
In few seconds in life you will be blackened by us

This is what we made of
Full of anger! Full of hatred
This is what we made of

You're so dead
What did I just said? This is BLACK TERRITORY
