Slip out of my skin  
Deny and try again  
A green trap kit is where I've been  
Stop deciding  
Whatever will remain  
Both of us will lie again  
Captured with shame  
Leave in silence  
Don't cause any pain  
Liveable but in your brain

We'll never be the same again  
we came up fighting in  
We're tearing down what we began  
Tear it down again  
And noone else can take the blame  
The day before you came  
I was affected by the latest bliss  
Come on over and take the risk

This time we built up  
A function to get numb  
But nothing will remain

And we'll never be the same again...

Someone turns off  
The close-up of this scene  
And every little thing I've seen

Will never be the same again  
We came up fighting in  
We're tearing down what we began  
Tear it down again  
And noone else can take the blame  
The day before you came  
I was affected by the latest bliss  
Come on over and take the risk.
