Sheila said  
To an open scene  
"I'd like to see you there  
Before you have to leave"  
She's coming up to score  
She don't know what it meant  
But now it pays the rent

I'd like to see  
What's in her head  
Staring down  
Until she's bent

She got up at night  
She had a bite to eat  
She's looking for friend  
Before she hit the street

Expect what isn't real  
Lonely words should answer  
She's told how to feel

I'd like to see  
What's in her head  
Staring down  
Until she's rend  
I'd like to see it  
Until the end

She is falling, she is falling,...

I'd like to see  
What's in her head  
Staring down  
Until she's rend  
I'd like to see it  
Until the end
