### "Christmas Eve"

Visit "[Christmas Eve](#)" on MotoLyrics.com

Say goodbye to November  
She must be on her way  
The cold winds of December  
Look like they're here to stay  
Me, I'll just count the snowflakes  
As they start to fall  
Getting lost in the beauty  
The magic of it all...

And our eyes filled with wonder  
As the reindeer take to flight...

Chorus:  
It's Christmas eve  
Bells will ring  
Through the town we gather to sing  
Christmas eve  
Has begun  
Peace and love to everyone

Light the festive candles  
They'll chase the shadows away  
Gathering round the yule log  
With handfuls of holly  
Winter winds will whisper  
Through the shivering pines  
Never have the stars  
Looked brighter than tonight...
