### Verse 1

We took this on together  
We couldn't win alone  
It's hard to change directions  
It's all we know

We've seen the good  
And we've seen the bad  
We've waged a war  
On everything we had

There's an SOS  
I'm calling out  
My ship is sinking  
So watch me drown

### Chorus

You've become my ghost  
You make me fear, make me fall, make me run for  
cover

The thought of you is still haunting me  
You make me fear, make me fall, make me run for  
cover

### Verse 2

You always promised that you'd be true  
Well that was just a lie  
I was hiding from the surface  
That was the death of you and I

And though your back was turned  
Your hand it held the knife  
I was on the edge and almost fell  
Right next to the devil

### Chorus

You've become my ghost  
You make me fear, make me fall, make me run for  
cover

The thought of you is still haunting me

You make me fear, make me fall, make me run for  
cover

Bridge

The night is my enemy  
And you're the only reason why  
(With one eye opened, I'll sleep tonight)  
So keep your distance from me  
I'll wait up till the morning light  
(To stay awake is to stay alive)

The less I dream

Every waking moment is a breath of new air  
When the sun lights the sky  
I can hold my head up knowing that I got through the  
night

Chorus

You've become my ghost  
You make me fear, make me fall, make me run for  
cover

The thought of you is still haunting me  
You make me fear, make me fall, make me run for  
cover
