And now I look for answers, answers I can believe
I seek the truth and find it, can science answer me?
I feel there must be something deeper and
understanding what it means
Could now describe unseen connections as time
unfolds in front of me
Sensations now of falling, it's cold is something here?
I taste the fear around me like a womb I feel the
darkness
Now as I journey from this tomb
Stealing time, stealing time
And is it just my intuition that tells me why and how
things work
Existing present past and future connecting all the
universe
If you would only listen they don't want you to know
About the synchronicity and ways of understanding
And learn the secrets that they hold
Stealing time, stealing time
Sacrifice my whole life searching for the truth
Turn my back on the world I knew
Sacrifice my whole life searching for the truth
Can't go back to the world I knew
Stealing time, stealing time
(This will benefit you and in turn will benefit us)
Inside the shadows of your daydream you make your
own discovery
Moving toward the great enigma time standing still
eternally
And there are consequences as this journey begins
A non temporal state of ecstasy that now awaits you
No one can find this path but you
Stealing time, stealing time
Sacrifice my whole life searching for the truth
Turn my back to the world I knew
Sacrifice my whole life searching for the truth
Can't go back to the world I knew
Stealing time, stealing time
