Are you ready guys, ready for tonight?
Let's go out and have a really good time
If you're up for fun no one can bring you down
Oh, put on a smile and come on
We're going out to rock'n roll, lose our minds and lose
control
This is our lives, we do what we want
We sing and we drink all night long
It's hard to get a job after school
But it's even harder to play by the rules
We know what to do but you don't have a clue
Are you ready girls, for some action?
Well you'd better be, 'cause it's Friday night again
If you play it right, it could be your lucky night
So come on girl let me be your friend
I'll do this and that and that and this
If you buy me a beer I'll give you a kiss
I can't stay long I have to take a piss, do you like it like
this?
It's hard to get a job after school
But it's even harder to play by the rules
We know what to do but you don't have a clue
We are proud and we are free, we don't need your
factory
We'll be all right, just wait and see
