### "Scream"

I've got this burning in my ears  
That cracks me up and puts on years  
So turn it down your mouths too loud  
You and your stupid fucking crowd

Scream and shout until you die  
No one ever asks you why  
Scream and shout until you die  
No one ever heard your cry

You crack me up with your noise  
You and your little bully boys  
Screaming backs the only thing to do  
Look, you got me at it too

So now we're deaf to all the others  
Turn it up we are noise lovers  
It's so loud we have no choice  
And no one heard the little voice
