All the monkeys in the trees jumping up and down
All the people on the street messing down this sound
I am gonna .. I am no clown
Make the funky leader I will make the people come
People come people go
People come people go
Some give me .. where I am from
People come people come
Let me give you something .. hit the drum
People come people
Let me give you some
People come people
Let me give you some
Forget about the black we are all brown
Forget about the vanity we all wear a crown
.. makes you wanna I will make you ,
Come people come people
Let me give you some
Come people come people
Let me give you some
Come people come people
Let me give you some

Coming on coming on come stepping on coming on
Come on coming on bring it on now
Coming on coming on come stepping on coming on
Come on coming on bring it on now

Coming on coming on come stepping on coming on
Come on coming on bring it on now
Come people come people
Let me give you some
Come people come people
Let me give you some
Come people come people
Let me give you some
Come people come people
Let me give you some
