Ladies and gentleman
We are entering into the 5th Dimension
And did I mention we gone? We gone

Girl, I'm eons and eons, beyond these peons
Another human like me, there will never be one
The planet that I'm from, I can't even speak on
The stars is what I sleep on, the moon I put my feet on

The way my aura glows, you'd swear I'm made of neon
Cooler than the freon, that's in your Dodge Neon
They say the future's now, to me it hasn't begun
Stay tuned to me, and there will never be a rerun

So come and leap on my body and as we come
You'll probably feel moist, like the trees on the tropics
We gone, we out, no, we don't need rockets
We hop up on the mothership, and we gone, we slidin'

We slippin' through dimensions, we hyper space glidin'
Blastin' through the atmosphere, frightenin' in the
lightnin'
I know I'm out my mind girl but you know you like it
So hop up on my cosmic highway so we can ride it

Shawty, are you goin' my way?
Come on and ride on my cosmic highway
Let's go, let's go
Look shawty, I can't stay here on the earth no more
Another galaxy we must go

Ha, well, fresh out the sky I'm like a meteorite
So in the studio, no, I don't need to go write
Man, I just came up in the game because ya'll needed
more light
So, by the time I'm done there ain't gon' be no more
mics

And people ask me, "Bob, what kind of language is
that?"
'Cause I may blast into the future, I may never come
back

And I'mma leave with a 30,000 light year lead
Headin' to a distant planet called B.O.B

And then I'm gone, man they not ignorin' me
Takin' off from the half court, Air Jordan
All systems go, in ten seconds I'm orbittin'
Hangin' in the cosmos like a space ornament

Hit 'em up like a solar flare, oh, yes I bring the pain
Similar to an asteroid that's headin' to your brain
My lane, is something that they really cannot explain
They try to hold me down but man, it's me they can't
contain

Shawty, are you goin' my way?
Come on and ride on my cosmic highway
Let's go, let's go
Look shawty, I can't stay here on the earth no more
Another galaxy we must go

Oh, girl, come and go with me
I'll take you to my galaxy
I'm talkin' about venus, jupiter, mars
And I'm sayin', girl let's ride all night

And I need you for this ship, girl, to take flight
Let's go, let's go
Come on, baby, let me take it off
Another second we gon' blast if off

Look shawty, are you goin' my way?
Come and ride on my cosmic highway
Let's go, let's go
Look, I can't stay here on the earth no more
Another galaxy we must go
