Mankind sleeps in torment  
I just got my wooden box  
While others basked in glory  
I just tried to curse the day

Lived on worm and dust  
Sons of hell unite  
For the night

Sunshine burns the warriors  
But I don't feel my burns  
I just search the vindication  
For the love before

Buried in a lonely grave  
Sons of hell unite  
For the night

Mankind sleeps in torment  
I just got my wooden box  
Valerian forever  
Never see the light of day  
Ashes come and ashes go  
But I remain forever, waiting

For the night
