Bob
"Satellite"

Systems go
Satellite, Satellite
Minus 10
Twilight, twilight

I feel the moon
Pulling me away
Into the blue
Of the midnight's sky

If you can do
What I can do
Then stay in tune
Just feel the vibe

So can we get a systems go
And blast off like a
Satellite, satellite
Launching in minus 10 [T minus 10]
Headed straight to the
Twilight, twilight

So can we get a systems go
And blast off like a
Satellite, satellite
Launching in minus 10 [T minus 10]
Headed straight for the
Twilight, twilight

Well as I'm headed to the sky way up above me
I feel my body spinning feeling free and lovely
I am the rumbling sea so come with me
On this midnight's vibe

And you can feel it if you tune into your radio
Look at the sky look at the moon look at the way it glow
I ain't no ghost so don't be afraid to go
On this midnight's vibe

So can we get a systems go
And blast off like a
Satellite, satellite

Launching in minus 10 [T minus 10]
Headed straight to the
Twilight, twilight

So can we get a systems go

And blast off like a
Satellite, satellite
Launching in minus 10 [T minus 10]
Headed straight for the
Twilight, twilight

Like an astronaut floating off into the beyond
Entering into dimensions no one has ever yet seen
before
I do not need an engine I can ascend into the dark
Remember a dream is never a dream is never a dream
[is never a dream y'all]

Midnight's vibe

So can we get a systems go
And blast off like a
Satellite, satellite
Launching in minus 10 [T minus 10]
Headed straight to the
Twilight, twilight

So can we get a systems go
And blast off like a
Satellite, satellite
Launching in minus 10 [T minus 10]
Headed straight for the
Twilight, twilight

Systems go
Satellite, satellite
Minus 10
Twilight, twilight

Systems go
Satellite satellite
Minus 10
Twilight, twilight

Systems go
Satellite satellite
Minus 10

Midnight's vibe
