All night long, I sit and cry  
Well since the day, you said goodbye  
Well I been cryin', I can't sleep tight, all night long  
My last memories torture me, I can't dream, you set me  
free  
I lost my world, be in a whirl, all night long  
There was a time, the sun would shine  
There was a time, when you were mine  
But now I sing this lonely song, all night long  
All night long, it's just the same  
I hide my face, but not from shame  
Well in my room, I see a gloom, all night long
