I walked in ten o'clock
The music up we were ready to rock
Felt the touch your finger tips
A pretty thing grabbed my by the ear
she said "let's dance"
so I give it a try
but a girl in the back caught my eye,
not a thing that I could do
I didn't dance but she knew how to move,
She can't see what I see
Why can't she be?

We locked eyes it came as a surprise
That I love the way she move
Bands playing and my heart saying
that I love the way she move
the clothes I could breathe style and freeze
love the way she move
when the nights over I hope that I'll be closer
cause I love the way she move

fresh step across the floor
one look knew I wanted more
I bust out to break through the wall
This girl couldn't sing at all
She took the swing gave me a shot
I turn around girl see what I got
Last chance before it ends
The moment came when I saw her turn her hand
She can't see what I see
Why can't we be?

We locked eyes it came as a surprise
That I love the way she move
Bands playing and my heart saying
that I love the way she move

the clothes I could breathe style and freeze
love the way she move
when the nights over I hope that I'll be closer
cause I love the way she move

every boy's what I wanted so bad
the girl across the room the one I couldn't have
don't leave me with my fears standing
it's all clear worries disappear
we're gonna make it work, make it right
whatever happens from there okay but it starts tonight
I want to take you out to the floor
We gonna bust, bust, bust some more
Think about it you gotta take your time
But you know I wanna make you mine
Yeah let's dance come on make its move
I love the way you move

She can't see what I see
Why can't she be?

We locked eyes it came as a surprise
That I love the way she move
Bands playing and my heart saying
that I love the way she move
the clothes I could breathe style and freeze
love the way she move

when the nights over I hope that I'll be closer
cause I love the way she move (x3)

Love the way she move
I love the way she move
Love the way she move
I love the way she move
