this between me and you
i'm trying to avoid rumours in the street
i'm far from ashamed of you and me
boo, what you tell your friends
they at the 2 seats and,
then it comes back again
so let me show you what i mean

if you believe those girls around you
i call, you should listen to me baby
if you believe what i'm saying about it
you know that you should keep it,
between me and you

the crowd is talking
must be someone you meeting
i think she's jealous
she's seen us two (me and you)
gotta keep it quiet
even if they don't buy it
baby don't tell them,
it's between me and you

please don't let them know and,
have you got it baby?
then god opened the skys
show me your eyes and stuff

they see you in my car,
just like a superstar
together we raise the bar
girl let me know you what i mean

if you believe those girls around you
i call, you should listen to me baby
if you believe what i'm saying about it
you know that you should keep it,
between me and you

goodbye is talk and,
must be someone you're dreaming
i think she's jealous

she's seen us two (me and you)
gotta keep it quiet
even if they don't buy it
baby don't tell them,
it's between me and you

please don't let them know and,
what we got baby
not even let me answer,
is the answer
it's not baby
they asked if you with him
you say we're only friends
and let that be it
and we'll move in silence and shadows
baby you and me

but if you believe those girls around you
i call, you should listen to me baby
if you believe what i'm saying about it
you know that you should keep it,
between me and you

the crowd is talking
must be someone you meeting
i think she's jealous
she's seen us two (me and you)
gotta keep it quiet
even if they don't buy it
baby don't tell them,
it's between me and you

the crowd is talking
must be someone you meeting
i think she's jealous
she's seen us two (me and you)
gotta keep it quiet...
fades out
