The writing's on the wall  
I try to walk then I stumble and I fall  
The night is closing in  
I try to talk I don't know where to begin  
When all is said and done  
How can I prove I'll always be the one

Love me love me or leave me  
But don't stay just to deceive me  
So love me love me or leave me alone  
Angel of night

The tracks I'm loading down  
I hear the voices of shadows underground  
The soldiers in the rain  
I face the angel who brought me all this pain  
When all is said and done  
How can I prove I'll always be the one

Love me love me or leave me  
But don't stay just to deceive me  
So love me love me or leave me alone  
Angel of night
